Professional Summary

Senior Associate Programmer with 3 years building microservices and REST APIs. Strong expertise in .NET/ASP.NET Core, Python 3/FastAPI, and Angular. Focused on clean code, SOLID Principles, and production-grade system optimization.

Technologies

Languages: C#, JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frameworks & APIs: ASP.NET Core, Web API, REST APIs, RESTful Web Services, FastAPI, Entity Framework, LINQ, Dependency Injection, Node.js, Express.js, Angular

Databases & Cloud: SQL Server, Database Optimization, Query Optimization, MongoDB, Azure (Event Grid, Blob Storage), Docker, Containerization, Microservices Architecture, Caching

DevOps & Tools: CI/CD Pipelines, GitHub Actions, Continuous Integration, Continuous Deployment, Windows Services, Git, JWT, Postman, VS Code, Debugging

Core Skills: Microservices Architecture, System Design (HLD/LLD), Event-Driven Architecture, Multithreading, Concurrency Management, Async/Await, SOLID Principles, OOP, Scalability, Performance Tuning, CI/CD, Unit Testing, TDD

Professional Experience: 3 Years

Senior Associate Programmer, ICRA Analytics Ltd. – Kolkata, India Jul 2023 – Present

- Architected event-driven microservices on Azure processing 1,000+ daily events with 99.5% accuracy. Implemented monitoring and logging. Reduced latency by 90%, automated 85% manual workflows.
- Optimized SQL queries and Entity Framework with caching strategies, accelerating pipelines by 30%.
- Developed REST APIs using ASP.NET Core Web API and Angular frontends handling 4,000+ daily transactions.
- Converted legacy batch processes to Windows Services using multithreading and async/await, improving reliability by 50%.
- Implemented CI/CD pipelines with GitHub Actions, reducing production bugs by 30%.
- **Tech:** C#, ASP.NET Core, Python, FastAPI, REST APIs, SQL Server, Entity Framework, Angular, Azure, Microservices

Education

University of Calcutta Jul 2019 – Jun 2023
B.Tech. in Computer Science and Engineering CGPA: 7.47/10

Projects

CodeRank | Online Code Execution Platform Dec 2025 – Jan 2026
Source Code

- Architected and deployed a full-stack code execution platform supporting Python, JavaScript, and C++ . Implemented concurrent execution with proper queue management, real-time output polling, and achieved 99.9% uptime SLA in production.
- Engineered asynchronous queue-based system with JWT authentication, rate limiting, load balancing, and comprehensive error handling. Ensured thread-safe concurrent operations and exception handling.
- **Stack:** Node.js, Express, Angular, MongoDB, JWT, Docker, Concurrency Control, Load Balancing, Production Deployment

Emotion Detection | Deep Learning Classifier Feb 2023 – Jun 2023
Source Code

- Built a CNN-based facial emotion classifier using deep learning, achieving 80% accuracy. Integrated real-time webcam detection with proper image preprocessing and model optimization.
- **Stack:** Python, TensorFlow, Keras, OpenCV, Pandas, Neural Networks, Deep Learning, Image Processing

Achievements

- **AIR 823 in WBJEE 2019** – Top 0.5% among 150,000+ candidates nationally.
- **Solved 500+ problems** on LeetCode and HackerRank with strong Data Structures and Algorithms proficiency.
